Bionic Beats 2025

A Monthly Publication

Sagar Shetty Speaks at the AOPA 2025 Conference

In the month of January, our Director of Clinical Operations, Sagar Shetty, BOCO, BOCP, was invited to be one of the speakers at the 2025 AOPA Leadership Conference. The yearly event was an opportunity for leaders to network, learn, explore trends, and engage in thought-provoking discussions that would help shape the O&P field into the future.

His participation in the event was focused on identifying and thinking about the next big things in O&P. It involved recognizing emerging trends and technologies that would significantly impact patient care, fabrication, education, research, and policy.

What's Happening at Bionic

Our Chicago team had the chance to participate in the American College of Wound Healing and Tissue Repair Conference. At the event, we had the chance to speak to several health care professionals about how their patients could benefit from orthotic and prosthetic care.

Our team in Florida had a great time teaching physical therapists at the University of St Augustine for Health Science. We covered a variety of hands-on topics, including 3D printing, digitalization and upper limb prosthetics.

Kelly Haen, CPO based out of Wisconsin traveled to Dublin, OH for a 3-day workshop focused on upper extremity prostheses. She had the chance to bring one of her patients for trials and experience real life applications of his prosthetic hand.

Fabrication Spotlight

Bionic New Hires

Welcome to the Bionic Family!

Ciara Williams
Clinic Office Administrator
Munster, IN

Paul Bourque, CO
Certified Orthotist
Titusville, FL

EMPLOYEE OF THE MONTH

KASHA GARBER!

"I would like to nominate Catherine (Kasha) Garber for Employee of the month. Kasha works extremely hard to make patients feel welcome when they come into our office, most of the time they leave laughing and joking with her. She also is a tremendous team player she has taken on the role of traveling back and forth from our Mishawaka and Elkhart offices multiple times per week. She ensures that all of her patients in Elkhart have the items they need by coordinating with practitioners to bring their items to and from Mishawaka to Elkhart and if they are unable to, she brings the items herself! She goes above and beyond to step in whenever anyone needs help and is always willing to take on more responsibilities. Kasha has mastered OPIE and navigating patient charts in such a short amount of time it's a true testament to her work ethic and focus because she wants to provide our patients with the best care possible."

Tips to Help Your New Year's Resolutions Stick in 2025

noretafamilymed.com

1. **IF YOU WANT TO CHANGE A BAD HABIT:**

- **Tell someone you're making a change.** They can help keep you accountable and be a source of support while you are in the process of making the change.
- **Surround yourself with supportive people.** Support often makes all the difference in achieving a goal. We all know of people who "peer pressure" us into making wrong choices, so now is a good time to avoid those folks!
- **Change your routine.** Let's say you want to stop smoking, but you frequently hang out with co-workers who smoke on their work breaks. Try doing something different on your breaks – going for an indoor walk around the building, getting a cup of coffee, etc.

2. **IF YOU WANT TO EXERCISE:**

- **Schedule time on your calendar to exercise.** Just like you schedule your doctor and hair appointments, schedule time to exercise so that you will keep that time free.
- **Set small achievable goals.** If you don't exercise at all right now, it's not reasonable (or safe!) to set a goal of exercising 5 times per week starting next week. Perhaps your first goal could be to take a walk once a week. If you've been consistent after a month, then consider setting a new goal of adding a 2nd day of exercise per week by doing an exercise video on YouTube.

3. **IF YOU WANT TO CHANGE YOUR DIET:**

- **Plan ahead.** This is the single biggest tip I give to my patients. You don't even have to chop up your veggies ahead of time! Sit down once a week and think about what your scheduling for the upcoming week looks like. What days are you going to cook at home? What days are you likely to need to get a meal on-the-go? What are you going to make and take for lunch? What can you grab for breakfast that doesn't take too much time to prepare? Go to the grocery store and buy what you need for the week.
- **A meal does not need to involve cooking.** A cup of yogurt in the morning could be all you need. A salad for lunch usually involves no cooking.

4. **IF YOU WANT TO LOSE WEIGHT:**

- **See #2 and #3 above!**
- **Don't forget about your mental health.** Are you not enjoying life as much? Are you feeling worried about things out of your control? Just not feeling like yourself? These are good reasons to make an appointment with your primary care doctor.
- **Focus on what you can control and forget about what you can't.** Elements of diet, exercise, sleep and mental health are controllable, so focus on those, instead of the pounds on the scale!

5. **OVERALL TIPS:**

- **Don't be too hard on yourself.** It is normal to have a few stops and starts along the way. For instance, if you start drinking again after stopping for a while, just set another quit date and try it again!
- **Visit your primary care doctor!** It's no big surprise that I recommend this since I am a family physician, but there are additional tips, and even medicines that can be prescribed to help you stop smoking, quit drinking, lose weight, etc. It's hard to know if these medicines are right for you based on TikTok reviews or TV commercials. That's why you should talk to someone who knows your health history well, like your doctor.
