BIONIC BEATS

AOPA 2023: INDIANAPOLIS

Bionic was proud to send a team to represent the Bionic Family at AOPA 2023 in Indianapolis this year, representing us in their bright green polo shirts!

Bionic debuted a new booth to promote both our clinics and our One Source program, and presented on Saturday to share our skills and knowledge with the industry. The National Assembly this year was hosted in Indianapolis, IN, at the Indiana Convention Center - just across from Lucas Oil Stadium.

The Assembly celebrated what makes Indianapolis unique, while bringing industry insiders together from all across the United States to celebrate the art and the science of the O&P field.

Bionic's presence continues our unique and forward-thinking engagement with the industry at large, as one of a very few clinic groups to be present as an exhibitor. This showcasing of the Bionic's difference, as well as what the One Source program has to offer, help us to show how we stand out and what makes us unique.

The Assembly was an all-around success, and Bionic is thrilled to begin preparing for the next.

Employee of the Month:

JENNY HUTCHISON!

Jenny Hutchison's 25 years of service in the field of Orthotics and Prosthetics, have been nothing short of remarkable. Throughout her career, Jenny has made significant contributions impacting the lives of countless individuals in need of orthotic devices.

She began her journey in Orthotics and Prosthetics in 1998 with me. Jenny is eager to apply her knowledge and skills to help people with physical disabilities regain their mobility and improve their quality of life.

Jenny has worked beside me for 25 years and has always been dedicated and willing to help people in need.
