Bionic Turns 17!

On May 15th, we proudly celebrated 17 incredible years of cutting-edge prosthetic and orthotic care! Across the nation, our offices were buzzing with excitement with decorations, sweet treats, music, and plenty of smiles as each team joined in the fun. From singing and dancing to cake and camaraderie, it was a true reflection of the passion and energy that fuels everything we do.

Over the past 17 years, Bionic has grown from a bold vision into a nationwide family dedicated to delivering competent, compassionate care. We're grateful for every patient, partner, and team member who has been part of this journey...and we're just getting started!

Here's to the future, and to many more years of innovation, impact, and celebration together!

WHAT'S HAPPENING AT BIONIC

MOVE FOR JENN

Our North Carolina team proudly sponsored a hole at the Move for Jenn event. Our ladder ball game brought great energy to the course!

The Move for Jenn foundation provides activewear prosthetics to those who have suffered the loss of a limb to sarcoma cancer while raising awareness. We were honored to support such an inspiring cause and connect with the community.

FIRST FOX VALLEY AMPUTEE MEETUP

Our Appleton clinic hosted their first Fox Valley Amputee Meetup! What a great opportunity for local amputees to connect, share stories, and build a community!

ADVANCING PATIENT CARE

Our Florida team presented an educational lecture to hand surgeons from Baptist Hospital. We had a highly interactive discussion on the latest advancements in upper extremity prosthetics and explored how we can support their patients with these innovative technologies. The group was highly engaged and eager to learn.

O&P IN ELEMENTARY

Our Bionic team in Bolingbrook visited BJ Ward Elementary for their career day. It was so fun introducing students, grades kindergarten-5th, to the amazing world of O&P!

BODY BEATS

Wellness Tips to Keep You Moving Forward

Hydrate Like You Mean It

As the temps rise, your body needs more water to stay sharp and energized. Aim for half your body weight in ounces of water per day, and try flavoring it naturally with cucumber, lemon, or mint for a refreshing twist.

SPF is Your BFF

Sun damage happens fast—even on cloudy days. Wear sunscreen daily (at least SPF 30), reapply often, and don't forget your ears, neck, and hands!

Summer Snackin'

Choose hydrating, energy-boosting foods like watermelon, berries, cucumbers and yogurt. Need a quick fix? Try a smoothie with frozen fruit and a splash of coconut water.

Sleep Reset

Longer days can throw off your routine. Stick to a consistent sleep schedule and wind down with screen-free time at least 30 minutes before bed.

Sunshine Mood Boost

Sunlight helps with Vitamin D and mental clarity, but too much can lead to fatigue or heat exhaustion. Try early morning or late evening walks for a balance of fresh air and comfort.

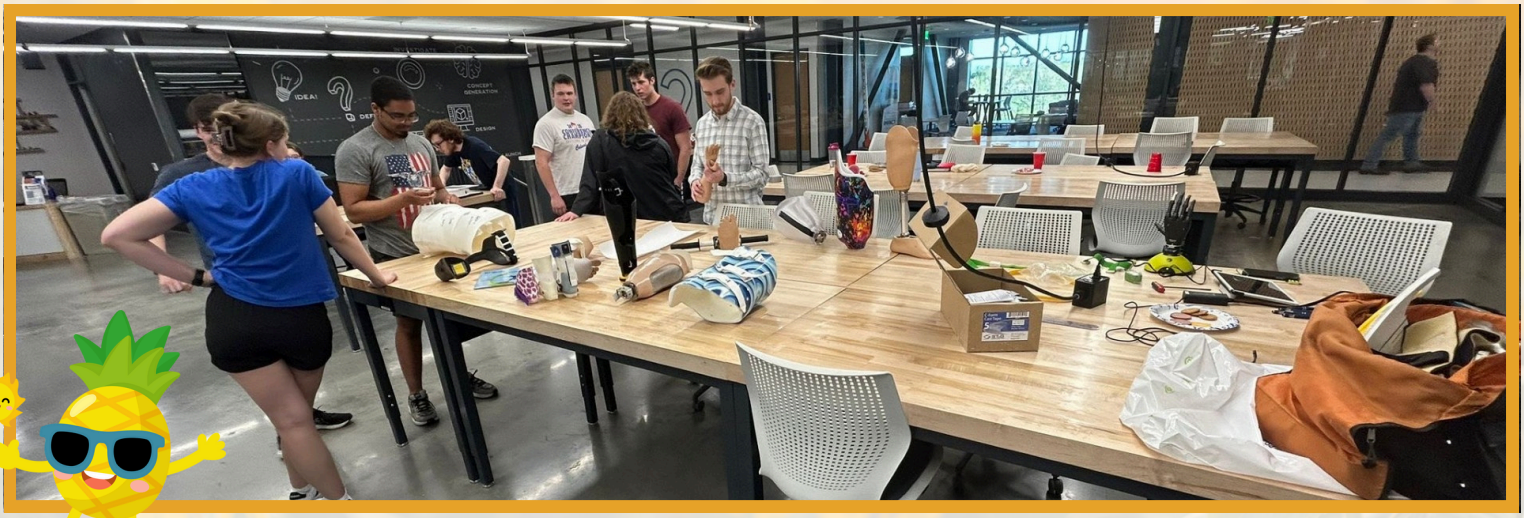
BiOnic ON CAMPUS

VALPARAISO UNIVERSITY

We visited the Biomedical Engineering students at Valparaiso University in Valparaiso, IN, delivering an educational and engaging presentation packed with True/False questions, clever puns, and everything you need to know about O&P!

UNIVERSITY OF WISCONSIN-PLATTEVILLE

Our Wisconsin team recently presented a 3D printing and orthotics & prosthetics lecture at the University of Wisconsin–Platteville's engineering school. It was a great opportunity to share insights, spark interest in medical innovation, and connect with the next generation of engineers.



FABRICATION SPOTLIGHT

AT BiOnic

Personalized designs like this are a perfect example of how a prosthesis can be both functional and fun!

Whether it's a pop culture favorite, a sports team, or something deeply personal, our fabrication team is here to help each patient feel truly seen in their device.

WELCOME TO THE TEAM!

WE'RE PROUD TO RECOGNIZE KRIS FOR HER DEDICATION AND EXCELLENCE!

"Kris has been a key member of the billing team. She consistently goes above and beyond to ensure accuracy and clarity in every case. Known for meticulous attention to detail, she is always reading the fine print, finding creative solutions to appeal insurance decisions, and following up diligently on claims.

Whether it is resolving complex billing issues, or simply being available for questions, she brings a level of professionalism and dedication that truly stands out. We are grateful for her commitment to excellence and outstanding support to the team."
