LIMITLESS LIVING

Check out one of our patients from our Pembroke Pines office, an above-knee amputee, on his recent trip to Hawaii! We surprised him with an awesome @alleles prosthetic cover and he was thrilled to show it off!

Due to his prosthesis, he's able to live an independent, limitless life as a fishing captain, traveling and enjoying his passions. THIS is why we do what we do!

WHAT'S HAPPENING AT BiOnic

CHICAGO ADAPTIVE OPEN

Our team recently attended the Chicago Adaptive Open, hosted by the Chicago District Golf Association, and it was an incredible day of connection and inspiration. We had the chance to share Bionic's mission, meet some amazing athletes, and even join in and play a round.

It was powerful to see how this opportunity could help bring the community together. It was a true celebration of resilience and strength.

DECONSTRUCTION DAY

Check out our Deconstruction Day at Chicago with NUPOC and Eastern Michigan students! They were able to disassemble, sort, label and clean all components. We had a blast!

VALPO TOURS BIONIC

We recently welcomed students from Valparaiso University's Occupational Therapy program for an inside look at our Merrillville fabrication lab. During their visit, they explored the world of prosthetic design and learned about innovative techniques like 3D printing and custom fabrication. The highlight of the day was a special guest speaker—an occupational therapist who is also a congenital amputee. She shared her powerful personal and professional journey, offering a unique perspective on the impact of prosthetic care and the importance of empathy in clinical practice. It was an inspiring day of learning, innovation, and connection!

PRIMEFARE

Our team recently attended PrimeFare, taking full advantage of the opportunity to earn CEUs while staying up to date on the latest innovations in the field. It was a productive weekend of learning, collaboration, and connection. A highlight was reconnecting with BrianRobotics. Their continued work in neuro-controlled prosthetics and intelligent limb systems aligns closely with our mission to provide advanced, patient-centered care.

VALPO BIOMEDICAL ENGINEERING CAMP

Bionic had a blast joining Valparaiso University's Biomedical Engineering Summer Camp for its final event, where high school students spent the week designing prosthetic devices tailored to assigned "patients." Teams put their creations to the test in challenges like knot-tying, cup-stacking, and a water relay. One of our residents and one of our patients served as guest judges, selecting the "Judge's Favorite" prosthesis. We were honored to be part of such a creative, hands-on experience!

HSS LONG ISLAND

Our team in the Florida region recently had the privilege of visiting the Hospital for Special Surgery in Long Island, where they gained first-hand insight into the life-changing impact of osseointegration. The visit included an in-depth presentation and interactive breakout sessions, providing a comprehensive, hands-on look at this groundbreaking technology in action.

NEW HIRES

Kyndall Mayer
Resident
Charlotte, NC

Andrew Sloan
Resident
Owensboro, KY

William Roggow
Patient Care Advocate
Mishawaka, IN

Kashvi Pota
Biomedical Engineer
Merrillville, IN

Renee Jerkins
Accounting Assistant
Valparaiso, IN

Ryan Linville
O&P Trainee/
Support Personnel
Cincinnati, OH

Claudia Bono
HR Assistant
Valparaiso, IN

Victor Chavana
Patient Care Advocate
San Antonio, TX

Crismary Turbi
Patient Care Advocate
Pembroke Pines, FL

Jaquelin Munoz
Clinic Office Administrator
Greensboro, NC

WELCOME TO THE TEAM!

EMPLOYEE OF THE MONTH

BRANDON WHITTEMORE!

Brandon has consistently gone above and beyond by taking on additional responsibilities without hesitation and handling them with a great attitude. His communication with the clinical team is clear, consistent, and professional, helping to improve daily workflow and collaboration. He brings a positive energy to the team and is a dependable, valued member of our organization.
